EDUCATION

JIS college of Engineering, Kalyani

BTech Information Technology - 8.78

2020 - 2024

Kashiram Das Institution, Katwa

12th - 73.4

2018 - 2019

SKILLS

- **Programming Languages:** C, C++, Java, JavaScript, SQL, HTML
- **Frontend Technologies:** React.js, Tailwind CSS, HTML5, CSS3
- **Backend Technologies:** Node.js, Express.js, REST APIs, MongoDB
- **Database Management:** MySQL, MongoDB, Database Design, SQL Queries
- **Subject Concepts & Tools:** Object-Oriented Programming (OOP), Data Structures and Algorithms, Operating Systems, DBMS, JDBC, Linux
- **Version Control & Collaboration:** Git, GitHub
- **Certification:** The SQL Specialization by University of Colorado Boulder | The Complete 2023 Web Developer Bootcamp by Dr. Angela Yu | CISCO Networking Essentials | AWS Academy Cloud Architecting | Namaste React & Namaste Node (Frontend & Backend Development) by Akshay Saini

WORK EXPERIENCE

Persistent System

Intern

May 2023 - August 2023

- **Completed** training modules on **Core Java, J2EE (Servlet & JSP), JDBC, and SQL.**
- **Gained hands-on experience** with **MySQL databases**, optimizing queries and improving database management efficiency.
- **Enhanced** Java programming skills through coding exercises and project assignments, focusing on **backend development.**
- **Strengthened** knowledge in **computer networking** and **Linux OS** through troubleshooting tasks and practical exercises.

Simplbyte

Web development Intern

March 2023 - April 2023

- **Developed** responsive web pages using **HTML, CSS, JavaScript, and React.js**, ensuring user-friendly designs.
- **Collaborated** with cross-functional teams to optimize **web development processes**, enhancing workflow efficiency by **20%.**
- **Integrated** modern frontend technologies, improving website performance and responsiveness.

MTA Learning Private Ltd

Trainee

February 2023 - March 2023

- **Completed** comprehensive training in **web development**, focusing on **frontend technologies** like **HTML, CSS, and JavaScript.**
- **Built** multiple real-world projects to apply front-end skills and demonstrate coding proficiency.
- **Learned and applied** best practices in **version control, code organization, and collaborative development** using **Git.**
- **Received feedback** from mentors to improve coding techniques, problem-solving abilities, and code optimization.

PROJECT

Phytopixel

- **Developed** a machine-learning application for detecting plant diseases using **Convolutional Neural Networks (CNN)**, achieving **85% prediction accuracy** in classifying plant health.
- **Engineered** a responsive **React.js frontend** to interact with the machine learning model, hosted on **Google Cloud** using **FastAPI**, enabling real-time predictions and smooth user experience.

Encipher

- **Designed and implemented** a data encryption tool using **Symmetric Key Algorithms** for secure message transmission, with an end-to-end encryption and decryption process.
- **Created** an intuitive user interface for inputting and converting encrypted messages, ensuring seamless decryption to display original content.
- Focused on enhancing **data security** and demonstrating proficiency in **cryptography principles** for practical application.

AmourVerse

- **Built** an engaging **React.js frontend** for a dating platform, implementing features such as **real-time messaging**, user authentication, and dynamic user feeds with pagination.
- **Developed** scalable **RESTful APIs** using **Node.js, Express, and MongoDB**, supporting user data management, secure login, and efficient content delivery.
- **Optimized** backend performance, resulting in a **40% reduction in API response times** and improved user experience across multiple devices.
